## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims(in part) 1,2,6,11,12,13-17 are drawn to compounds, compositions, and a method of use for Formula I' of generic claim 1 wherein component A = Pyrazine, Pyrimidine, Triazine, Pyridazine, classified in class 544, subclasses various depending on the nature of the substituents R1-R3 and bridges X, Y. If this group is elected a single species from working examples must be disclosed with all variables exactly defined. Further restriction will be required as there are many unknowns.
  - II. Claims(in part) 1-17, drawn to compounds, compositions, and a method of use for Formula I' of generic claim 1 wherein component A = Pyridine, classified in class 546, subclasses various depending on the nature of the substituents R1-R3 and bridges X, Y. If this group is elected a single species from working examples must be disclosed with all variables exactly defined.
  - III.. Claims(in part) 1,2,11-17, drawn to compounds, compositions, and a method of use for Formula I' of generic claim 1 wherein component A = Pyrrole, Thiazole, Oxazole, Imidazole, Pyrazole, Isoxazole, Triazole, Isothiazole, Imisazole, classified in class 548, subclasses various depending on the nature of the

substituents R1-R3 and bridges X, Y. If this group is elected a single species from working examples must be disclosed with all variables exactly defined. Further restriction will be required as there are many unknowns.

IV. Claims(in part) 1,2,11-17, drawn to compounds, compositions, and a method of use for Formula I' of generic claim 1 wherein component A = Thien, Furane, classified in class 549, subclasses various depending on the nature of the substituents R1-R3 and bridges X, Y. If this group is elected a single species from working examples must be disclosed with all variables exactly defined.

V. Claims(in part) 1-17, drawn to compounds, compositions, and a method of use for Formula I' of generic claim 1 wherein component A = rings not included in above Groups I-IV classified in various classes, subclasses various depending on the nature of the substituents R1-R3 and bridges X, Y. If this group is elected a single species from working examples must be disclosed with all variables exactly defined.

2. The inventions are distinct, each from the other because of the following reasons:

- The claims are drawn to structurally dissimilar compounds;
- The compounds are classified separately;
- The compounds require separate literature searches;
- The compounds are not art recognized equivalents, and
- They are made and used independently.

Art Unit: 1624

Additionally, the scope that a prior art anticipating one compound under 35 U.S.C. 102 would not render obvious another compound of the same claim under 35 U.S.C. 103.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-V, restriction for examination purposes as indicated is proper.

5. Claims 1, 11, 12,13 are generic to a plurality of disclosed patentably distinct species comprising A component making a 5-membered heteroaryl ring with 1 N(= pyrrole), with 2N (= 1,2-diazole; A component making 6-membered heteroaryl ring with 1N (= pyridine), with 2 N (= 1,2-diazine). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr.Bullock on 5/12/03 to request an oral election to the above restriction requirement, but did not result in an election being made

Art Unit: 1624

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
